| | <p>they can be removed, and disability etiquette, advice for interactions between non disabled and disabled people</p> |
| Neurodivergence | <p>This provides an introduction to neurodiversity and focuses on neuro divergence and neuro minorities. The training looks at sensory profiles, behavioural responses and reasonable adjustments. The training looks at neuro divergence through the lenses of the medical and social model and also introduces the neuro diversity paradigm, a fresh and rights based way to understand neuro minorities in our society.</p> |
| Digital Accessibility | <p>This training starts by looking at how disabled people use digital information and looks at the reasons why digital content is inaccessible to many disabled people. It provides a framework to help you make sure that your media and web content is made inclusive and</p> |
